TECHNICAL SKILLS

Python · PyTorch · TensorFlow · Machine Learning · Deep Learning · Computer Vision · Medical Image Analysis · Federated Learning · Self-Supervised Learning · Explainable AI · Research Methodology · Git / GitHub · Kaggle · Jupyter Notebook

LANGUAGES

Pashto
Urdu
English — *Intermediate*

PERSONAL SKILLS

- Research and Critical Thinking
- Problem-Solving
- Scientific Writing
- Literature Review
- Analytical Thinking
- Independent Learning

HOBBIES

Music · Travel · Cricket

ZIA ULLAH

AI RESEARCHER

AI Research · Machine Learning · Deep Learning · Computer Vision

PROFILE

Computer Science graduate with a strong interest in Artificial Intelligence, Machine Learning, Deep Learning, and Computer Vision. My research focuses on developing efficient and reliable AI solutions, particularly in medical image analysis, brain tumor classification, skin lesion classification, and video anomaly detection, exploring deep learning architectures, attention mechanisms, self-supervised learning, and explainable AI.

RESEARCH EXPERIENCE

SkinNet — Dermoscopic Skin Lesion Classification

Research on multimodal skin lesion classification using EfficientNetB3, CBAM attention, and clinical metadata, with a focus on leakage-controlled evaluation.

In pre-review after first revision · Computer Methods in Biomechanics and Biomedical Engineering

FedBrainSSL — Brain Tumor Classification

Developing a self-supervised learning approach to reduce labeled-data requirements for brain tumor classification in a federated learning setting.

In preparation

Online Explainable Video Anomaly Detection

Research on video anomaly detection using frozen CLIP features, temporal modeling, selective vision-language verification, and tracking.

In preparation

Medical Reasoning with Reinforcement Learning

Investigating supervised fine-tuning and GRPO-based reinforcement learning for medical image classification and external evaluation.

In preparation

MANUSCRIPT UNDER REVIEW

Zia Ullah, Faizan Ullah, Muhammad Haris Khan, Dilawar Shah, Shujaat Ali, Muhammad Tahir. *SkinNet: Leakage-Controlled Multimodal Dermoscopic Image Classification Using EfficientNetB3, CBAM Attention, and Clinical Metadata.* Under review, *Computer Methods in Biomechanics and Biomedical Engineering*.

EDUCATION

BS in Computer Science

Bacha Khan University, Charsadda, Pakistan

Graduated 2025 · GPA 3.17 / 4.00

CERTIFICATIONS & TRAINING

Advanced Python Course

National Vocational & Technical Training Commission (NAVTTC) · Three months

Diploma in Information Technology

One year
